Chișinău

INTERNATIONAL CONFERENCE WITH INTERNATIONAL PARTICIPATION
"Updates in the diagnosis and treatment of otologic diseases"
March 29th, 2019

The Republic of Moldova is a landlocked country between Romania and Ukraine that covers 33,845 square kilometers. The capital, Chişinău, is in the center of the country and has 740,000 inhabitants. Moldova is a multiethnic republic

Although it has a small area, the Republic of Moldova has a great potential represented first of all by the geomorphologic aspect of its territory – an unusual diversity of landscape reservations or scenery and unique geological monuments of European and world value. There are several museums in downtown Chisinau, including the museum of Archeology and Ethnography, the museum of Natural History, and the National Museum of Fine Arts. Moldova is famous for its wines.

State University of Medicine and Pharmacy “Nicolae Testemiţanu” is a scientific, curative and cultural centre of university training, residency and fellowship training as well as continuous undergraduate and postgraduate education of doctors and pharmacists from the Republic of Moldova. It was founded on the basis of Institute of Medicine no. 1 from St. Petersburg, which was evacuated during the World War II in Kislovodsk and subsequently transferred to Chisinau together with teaching staff and students, under the name of State Institute of Medicine.

The Institute began its activity on 20 October 1945.

The noble mission of educating staffs belongs to teaching teams of professors with a strong intellectual potential and a rich professional experience. About 1000 specialists, including 13 academicians and correspondent members of Moldova Science Academy, honorable members of academies from other countries, 149 PhD holders and 545 doctors in medical sciences, 14 Laureates of State Award in the field of science and techniques activate within 2 Departments, 63 Chairs, 6 courses and 20 scientific labs.

Over a period of 68 years of activity, the University trained over 38 thousand doctors and pharmacists, 5000 of them activating in Orient and Occident. At present, over 6200 students from the Republic of Moldova and about 26 countries of the world study at the Chairs and university courses located in 72 modern clinics and polyclinics.

The department of Otorhinolaryngology was founded on September 14, 1945. Professor V. Chekurin was appointed the head of the department.

WELCOME MESSAGE FROM THE ORGANIZERS

On behalf of the Organising Committee of the ENT conference of the Scientific and Practice Association of Otorhinolaryngology, the Republic of Moldova and my own name I give you a warm welcome to Chişinău and to the Republic of Moldova. There are invited internationally renowned professors with special lectures for ENT specialists of our country.

I think this conference will be an excellent opportunity for participants to understand the latest information on rhinology and will have the possibility to enjoy the interesting presentations of our guests from Germany, Ukraine, Romania and Lithuania.

Beside the scientific programme, I am sure that attractive social activities, historical and natural beauties of our country will be interesting during your stay in Chişinău.

Best regards,

Rector of State University of Medicine

And Pharmacy „Nicolae Testemiţanu”

Professor, Ph.D,

Academician of AS RM

Ion ABABII

INVITED SPEAKERS
