*ENT doctor, doctor of medical sciences, graduate in audiology and
auditory prosthetics, LOR Hospital, Baku, Azerbaijan*

Ewald Thurner

Dr. engineer , Area Manager MED-EL company

ENT NATIONAL CONFERENCE WITH INTERNATIONAL PARTICIPATION
"10 years of Cochlear Implantation in Moldova"

- 08:00 – 09:00 Înregistrarea
- 9.00-9.20 Cuvint de deschidere, - Rector USMF "Nicolae Testemițanu", Emil Ceban
- Director SCR "Timofei Moșneaga", Andrei Uncuță
- 9.20-9.40 Prof. Vetrician Sergiu - 10 years of Cochlear Implantation in Moldova
- 9.40-10.10 Prof. Eugenius Lesinskas – Development of Cochlear implantation program in Lithuania.
- 10.10-10.40 Prof. Sebastian Cozma – 24 de ani de Implantare cohleară în România – ce am învățat și ce nerămîne de făcut
- 10.40-11.00 - Dr. Xeyyam Masiyev- Development of Cochlear implantation program in Azerbadjan.
- 11.00-11.20- Alexandru Didencu -Implantarea cohleara la copii în Republica Moldova
- 11.20-11.40 - Enachi Victor - Implantarea cohleara bilaterala, mit sau realitate
- 11.40-12.00 – Guma Constantin – Asocierea hipoacuziei cu deficitul vestibular. Evaluarea copiilor pre și post implant cohlear
- 12:00 – 13:00 Lunch Break
- 13.00-13.30 – DI. Ewald Thurner, Area Manager MED-EL Vienna „30 Years MED-EL Vienna“
- 13.30-14.00 - Prof. Milan Profant-Cochlear implantation and Bone conduction implants in patients with cholesteatoma chronic otitis.
- 14.00-14.30 - Dr. Cristina Mârțu - Posibilități de restaurare funcțională auditivă prin implanturi active
- 14.30-15.00 – Conf. Chiaburu Angela – Screeningul universal la copiii nou-născuți
- 15.00 – 15.30 – Chirtoaca Diana Reabilitarea post implantare
- 15.30-15.45 – Chiaburu-Chiosa Doina - Actualități în patologia vestibulară periferică. Particularități distinctive ale vertijului central
- 15.45-16.00 - Noroc Iurie - Implantarea dispozitivelor cu ancorare osoasa si de ureche medie

INTERNATIONAL NATIONAL CONFERENCE WITH INTERNATIONAL PARTICIPATION
"10 years of Cochlear Implantation in Moldova"

The Republic of Moldova is a landlocked country between Romania and Ukraine that covers 33,845 square kilometers. The capital, Chişinău, is in the center of the country and has 740,000 inhabitants. Moldova is a multiethnic republic

Although it has a small area, the Republic of Moldova has a great potential represented first of all by the geomorphologic aspect of its territory – an unusual diversity of landscape reservations or scenery and unique geological monuments of European and world value. There are several museums in downtown Chişinău, including the museum of Archeology and Ethnography, the museum of Natural History, and the National Museum of Fine Arts. Moldova is famous for its wines.

State University of Medicine and Pharmacy "Nicolae Testemiţanu" is a scientific, curative and cultural centre of university training, residency and fellowship training as well as continuous undergraduate and postgraduate education of doctors and pharmacists from the Republic of Moldova. It was founded on the basis of Institute of Medicine no. 1 from St. Petersburg, which was evacuated during the World War II in Kislovodsk and subsequently transferred to Chişinău together with teaching staff and students, under the name of State Institute of Medicine.

The Institute began its activity on 20 October 1945.

The noble mission of educating staffs belongs to teaching teams of professors with a strong intellectual potential and a rich professional experience. About 1000 specialists, including 13 academicians and correspondent members of Moldova Science Academy, honorable members of academies from other countries, 149 PhD holders and 545 doctors in medical sciences, 14 Laureates of State Award in the field of science and techniques activate within 2 Departments, 63 Chairs, 6 courses and 20 scientific labs.

Republican Clinic Hospital „Timofei Moşneaga” initially had the status of a municipal hospital, being the first medical institution in Bessarabia. It began to function at the end of 1817. In the year of its 150th jubilee (1967), the hospital had 10 inpatient treatment wards, a republican consultative polyclinic for the rural population, the AVIASAN section, numerous laboratories, diagnostic offices, equipped with modern equipment. In 1977, a new building for the Republican Clinical Hospital was commissioned. Thanks to this fact, the institution essentially improved, the quality of medical assistance provided to the population, perfecting and diversifying diagnostic methods, the activity of laboratories and departments. As a consequence, 181 new diagnostic and treatment methods were implemented in practice. During the period of transition to the new economic market relations, the Hospital went through a difficult stage, which began to change with the implementation of the new medical insurance system in 2004. Currently, it operates under a contract with the National Company of Medical Insurance (CNAM), which guarantees regular funding. As a consequence, the problem of drug insurance was solved, new medical services and treatment methods were implemented, especially in the field of surgery—including minimally invasive surgery. The problem of reusing and equipping with modern equipment still persisted. The number of diagnostic investigations exceeded one million for the first time. The share of the rural population, from the total number of patients treated by SCR specialists, exceeded 85%. Currently, IMSP Republican Clinical Hospital "Timofei Moşneaga" has 795 beds.
