PROJECT SUMMARY

The main aim of the MINERVA project is to achieve the following specific objective: to develop a threefold strategy for the research community in Moldova and Armenia. Open science principles, supported by the government, will be undertaken by the government support, these initiatives seek to:

1. To advance national and international research
2. To establish digital repositories
3. To build human research capacity and promote publicly-funded research

MINERVA project plans to facilitate their career development and research activities.

Thus it will harmonize research and educational developments in higher education.
