CITAREA SURSELOR DE INFORMARE. STANDARDE ȘI STILURI DE CITARE. GESTIONAREA REFERINȚELOR BIBLIOGRAFICE: *MENDELEY*

Silvia Ciubrei,
master în Managementul
sănătății publice

REFERINȚE. CITĂRI

- Citările și referințele bibliografice sunt componente obligatorii pentru orice lucrare științifică: articol, carte, referat, comunicare, teză de doctor, master, licență etc.
- Referința bibliografică reprezintă datele care descriu o resursă de informare (sau o parte a ei) citată într-o lucrare, în baza cărora aceasta poate fi identificată și localizată.
- Referințele bibliografice reflectă gradul eticii și culturii informației a unui cercetător.
- Referințele bibliografice sunt expresia documentării autorului vis-a-vis de problema cercetată.

REFERINȚELE BIBLIOGRAFICE

- În Republica Moldova pentru alcătuirea referințelor bibliografice se utilizează **standardul SM ISO 690:2012 Informare și documentare. Reguli pentru prezentarea referințelor bibliografice și citarea resurselor de informare.**
- Obiect al referințelor bibliografice pot fi toate tipurile de documente publicate sau nepublicate (electronice) sau părțile lor componente.
 - Cărți și publicații monografice tipărite
 - Cărți și publicații monografice electronice
 - Contribuții în publicații seriale tipărite
 - Contribuții în publicații seriale electronice
 - Tipuri speciale de documente (teze, autoreferate, brevete de invenții, standarde ș.a.).

REFERINȚELE BIBLIOGRAFICE

- Standardul ISO 690 propune 3 modalități de prezentare a referințelor publicațiilor din care sunt extrase citatele:
 - a) Referință inserată în text între paranteze rotunde;
 - b) Referință inserată în text între paranteze patrate cu indicarea sursei la finele lucrării în Bibliografie;
 - c) Referință adăugată textului ca notă de subsol.

NOTĂ: Pentru evitarea reproducerii integrate a referinței bibliografice se folosește termenul latin **ibidem** (tot acolo, în limba rusă – “там же”), dar numai când următorul citat vine imediat după prima referință.

REFERINȚELE BIBLIOGRAFICE

- Fiecare element al referinței bibliografice trebuie clar separat de elementul următor printr-un semn de punctuație.
- După posibilitate în referință se menționează toți autorii. Autorii se indică în aceeași ordine ca și în document.
- În cazul unei lucrări cu mai mulți autori se poate menționa numele și prenumele primului autor, primilor doi autori sau primilor trei autori urmate de *et al.*, *ș.a.* sau *u dp.*
- Înaintea specificării documentului gazdă se scrie: pentru caractere latine – “In:” - pentru caractere chirilice – “B:”

REFERINȚELE BIBLIOGRAFICE

Ordonarea referințelor

- În liste referințele sunt, de regulă, prezentate în ordine alfabetică a primului element sau într-o succesiune numerică, corespunzătoare ordonării citărilor în text.
- Publicațiile descrise cu caractere diferite (latine și chirilice) formează două rânduri alfabetice: cele cu caractere latine (românești și străine) un rând; cele cu caractere chirilice alt rând.
- Publicațiile unui autor pot fi expuse în simplă ordine alfabetică a titlurilor sau sunt prezentate în ordine invers cronologică a anului de editare.

CITAREA

- Constituie o modalitate de stabilire a relației dintre ideile științifice expuse de autor și cele obținute anterior.
- Este o formă scurtă a referinței bibliografice, inserată în text între paranteze rotunde sau patrate.
- Permite identificarea publicației din care s-a extras citatul sau ideea comentată etc. și indicarea localizării în cadrul publicației sursă.
- Analiza citărilor reprezintă una din metodele de cercetare scientometrică.

STILURI DE CITARE

- Stilul APA - științe sociale, economie, educație, www.apastyle.org
- Stilul MLA - științe umaniste, arte, studii interdisciplinare, www.mla.org/style
- Stilul Chicago - științe umaniste, arte, www.chicagomanualofstyle.org
- Stilul Turabian - lucrări științifice, disertații, teze doctorat, www.press.uchicago.edu/books/turabian/turabian_citationguide.html
- Stilul ISO 690 - toate domeniile (SM ISO 690:2012)

STILURI DE CITARE

- Stilul ACS - American Chemical Society
- Stilul AMA - American Medical Association
- Stilul ASA - American Sociological Association
- Stilul AMS - American Mathematical Society
- Stilul APSA - American Political Science Association
- Stilul AAA - American Anthropological Association
- Stilul AIP - American Institute of Physics
- Stilul IEEE - Institute of Electrical and Electronic Engineers

METODE DE CITARE

CITAREA. SISTEMUL HARVARD

- Pentru citările în text se recomandă sistemul „nume–dată” (sistemul Harvard). Conform acestui sistem în citare se indică doar primul autor și anul de ediție al publicației.
- Dacă numele autorului este dat direct în text, anul se indică între paranteze rotunde, dacă nu, atât numele, cât și anul se dau în paranteze rotunde.

De ex.: După cum menționează **M. Rotaru (2007)**

sau **(Rotaru, M. 2007)**.

- Dacă două sau mai multe resurse de informare au un autor identic și același an de publicare diferențierea între ele se face adăugându-se după an litere mici ale alfabetului: *a*, *b*, *c*, etc. Ex.: **(Rotaru, M. 2007b)**

CONCLUZII

Prin citare se:

- recunoaște contribuția unei autorități
- redă ideile, cuvintele, abordările unui alt autor
- demonstrează o cercetare aprofundată
- oferă informații legate de tema cercetată
- constituie un instrument bibliometric

Softul Mendeley

<https://www.mendeley.com/>

- Mendeley este un program (un soft academic) gratuit, folosit pentru căutarea, salvarea și managementul documentelor și a referințelor bibliografice, pentru colaborarea și cercetarea on-line.
- Acesta funcționează sub forma unei combinații dintre o aplicație desktop și un site ce ajută la găsirea, partajarea și gestionarea rezultatelor cercetării.

MENDELEY

Softul Mendeley

<https://www.mendeley.com/>

- Este compatibil cu Microsoft Word, OpenOffice ș.a. generând automat peste 1000 de tipuri de bibliografii.
- Este o platformă academică de socializare care oferă 2 GB spațiu gratuit de stocare și sincronizare *cross-device* cu peste 100 de milioane de înregistrări bibliografice.

Lansarea softului Mendeley Desktop

The screenshot shows the Mendeley Desktop application window. The title bar reads 'Mendeley Desktop'. The menu bar includes 'File', 'Edit', 'View', 'Tools', and 'Help'. The toolbar contains icons for adding files, folders, refreshing, and help. A red box highlights the 'Add and Create' dialog box, which is open. The dialog has a title 'Add and Create' and a subtitle 'Click here to import documents and folders to your library or create new entries manually.' Below this, there are two sections: 'or import' and 'or create'. The 'or import' section is highlighted with a red box and contains links for 'Import other libraries' (with buttons for Endnote XML, BibTeX, and RIS) and 'Try Mendeley Web Plugin'. A red arrow points from the 'Add and Create' dialog to the search bar in the top right corner, which is also highlighted with a red box. Another red arrow points from the search bar to the main list of entries. A third red arrow points from the 'or import' section to the 'Add and Create' dialog. The main list of entries has columns for 'Title', 'Year', 'Published In', and 'Added'. The selected entry is 'MANAGEMENTUL CERCETĂRII ȘI TIINȚA DESCHISĂ – PROVOCARE A POLITICILOR DE CERCETARE-IN...'. The right sidebar shows details for this entry, including 'Type: Journal Article', 'Authors: A. Hanganu', and 'Year: 2020'. The 'Abstract' section is also visible.

Information Literacy of Medical Students Studying in the Problem-Based and Traditional Curriculum

Eskola, Eeva-Liisa

Information Research: An International Electronic Journal, v10 n2 Jan 2005

Introduction: This paper reports on part of a research project on relationships between learning methods and students' information behaviour in Finland. It has been suggested that student-centred learning methods, such as problem-based learning, influence students' information needs, seeking and use. The focus of this paper is on the concept of information literacy as a part of the students' information behaviour. Method: In 1998, sixteen theme interviews were conducted at the Tampere University Medical School, which applied the problem-based learning curriculum and fifteen interviews at the Turku University Medical School in the traditional curriculum with an early patient contact programme was implemented. Transcripts of the interviews were analysed for analysis. Analysis: Qualitative analysis was carried out with the assistance of the NUD*IST program. Results: Three main types of information literacy skills emerged from the analysis: 1. Developed information literacy skills 2. Simple information literacy skills, and 3. Undeveloped information literacy skills. The developed information literacy skills tended to appear more in the problem-based learning curriculum than in the non-problem-based curriculum. The results are reflected against Bruce's seven faces of information literacy. The study confirms earlier studies results of the superiority of small group instruction compared to lecturing as a teaching method on information literacy courses, and the importance of correct timing with integration to subject courses. Conclusion: The findings indicate that student's information literacy is developed on one hand through active use of information and sources in connection with real information needs, on the other hand through an educational context which offers opportunities to get different viewpoints on issues.

Free article

Abstract

Diabetes insipidus, characterized by excretion of copious volumes of dilute urine, can be life-threatening if not properly diagnosed and managed. It can be caused by two fundamentally different defects: inadequate or impaired secretion of antidiuretic hormone (ADH) from the posterior pituitary gland (neurogenic or central diabetes insipidus) or impaired or insufficient renal response to ADH

ANNALS OF THE NEW YORK ACADEMY OF SCIENCES
Special Issue: Hemoglobin Concentration for Assessing Anemia
REVIEW

Anemia epidemiology, pathophysiology in low- and middle-income countries

Camila M. Chaparro¹ and Parminder S. Suchdev^{2,3,4}

¹Independent Consultant, International Nutrition. ²Department of Pediatrics, Emory Global Health Institute, Emory University, Atlanta, Georgia. ⁴Nutrition Branch, Centers for Disease Control and Prevention, Atlanta, Georgia

Address for correspondence: Camila M. Chaparro, Independent Consultant, International Nutrition, camilachaparro@gmail.com

Anemia affects a third of the world's population and contributes to increased morbidity and mortality, decreased work productivity, and impaired neurological development. Understanding anemia's varied and complex etiology is crucial for developing effective interventions that address the context-specific causes of anemia and for monitoring anemia control programs. We outline definitions and classifications of anemia, describe the biological mechanisms

Concluzii

Softul Mendeley permite:

- Colaborarea rapidă și ușoară cu alți cercetători on-line;
- Colectarea, organizarea, stocarea și partajarea tuturor tipurilor de informații;
- Importarea rapidă a documentelor din alte biblioteci de cercetare;
- Găsirea documentației relevante referitoare la informațiile ce prezintă interes;
- Accesarea informațiilor on-line de oriunde și oricând;
- Adăugarea referințelor automat/manual;
- Încărcarea documentelor, făcându-le accesibile și sincronizându-le pe stații de lucru, pe Mendeley Desktop;
- Schimbul resurselor informaționale (referințelor) cu alți utilizatori Mendeley pentru o colaborare mai productivă;
- Organizarea mai ușoară a colecției de articole științifice de pe calculatorul personal, dar și crearea unui „dosar” cu informația găsită;
- Generarea automată a citărilor și a referințelor bibliografice.
